RZ 21 Dharampura Extn. Najafgarh, New Delhi, 110043 | +91 8826820030 | deepakkadian581@gmail.com | [linkedin.com/in/deepak-5a1749238](https://www.linkedin.com/in/deepak-5a1749238)

OBJECTIVE

Proactive B.Tech Computer Science (AI-ML) student with a strong willingness to learn and adapt to emerging technologies, aiming to enhance technical skills and contribute effectively to organizational growth.

PROJECTS

Lok Drishti : Sovereign Political Intelligence June, 2026

- Built a React 19 interface with interactive SVG election mapping and a constitutional quiz engine.
- Create a JWT-secured admin console with a database staging pipeline to safely propose and review system updates.
- Integrated ChromaDB and embeddings to enable semantic search queries over national legislative directories.

PathFinder : GenAI Career Guidance Assistant May,2026

- Make a career counseling platform with a React frontend and FastAPI backend, utilizing aiosqlite for database operations to persist user profiles, sessions, and chat histories.
- Built a document-processing pipeline using pdfplumber, PyMuPDF, and Tesseract OCR to extract resume text, LLM extraction to automatically populate user profiles.
- Integrated cloud and local models—specifically Llama-3.1, LM Studio, and a local T5-Large model implementing real-time response streaming and strict content guardrails.

Hand Gesture Recognition January 2026

- Trained CNN model for gesture recognition with image augmentation to reduce overfitting.
- Optimized hyperparameters to achieve high accuracy for sign language applications.
- Experiment with the hyperparameters to improve the accuracy and model performance

Portfolio Website November 2025

- Built a modern React/TypeScript site with Tailwind CSS and App Router architecture.
- Implemented interactive transitions and clean layouts to showcase projects and skills.
- Showcased Projects,Skills, education and Contact Informations

SVM Based Dog and Cat Recognition June 2025

- Built an SVM image classifier for cat/dog distinction using Kaggle datasets.
- Developed an end-to-end Python pipeline including preprocessing and feature scaling.
- Design end to end machine learning pipeline for image classification

EDUCATION

B.Tech in Computer Science (AIML) 2023 - Present

Sushant University, Gurugram

Class XII 2021

GBSSS. Dharampura | 80%

SKILLS

- Programming: Python
- Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, OpenCV, TensorFlow
- Deep Learning : Neural Networks, CNN, RNN, LSTM, GRU
- GenAI : LangChain, Embeddings, Chromadb, FAISSdb
- Web Development: HTML, CSS, JavaScript, React.js
- Tools: Git, Jupyter Notebook, Power BI, n8n
- Database: MySQL, MongoDB
